

Coral Gum (Common Name)

Eucalyptus torquata (Scientific Name)

PHYSICAL CHARACTERISTICS

Canopy potential: 15' – 30' wide

Annual Growth Rate: 24"

Powerline Compatible: 20' – 35' from base

Root Damage Potential: Low

Leaves: Greyish green in color, the blade has a lanceolate shape and is 3.5 to 4.7 in in length and 0.6 to 0.8 in wide.

Flowers: Normally coral-pink in color but white, cream and red flowered plants are known. They are simple with three to seven flowered.

ENVIRONMENTAL CHARACTERISTICS

Water Use: Low

Edible Fruit Producing: No

Allergenic: Low

BVOC Emissions: High

Sonoran Desert Native: No

Invasive Species: No

Tree Care: Drought tolerant but occasional water in the summer is best. Full sun is tolerant in most soils. Prune so that the canopy is lifted as high as wanted.
