

# Ghost Gum (Common Name)

**Corymbia papuana** (Scientific Name)

## PHYSICAL CHARACTERISTICS

Canopy potential: 20' – 35' wide

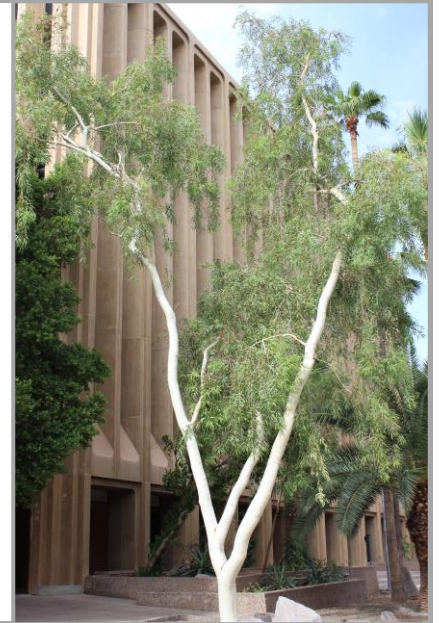

Annual Growth Rate: 36"

Powerline Compatible: 35' – 50' from base

Root Damage Potential: Moderate

Leaves: Grey green to light green lanceolate leaves tapering to a tip.

Flowers: Small white summer flowers, inconspicuous.

## ENVIRONMENTAL CHARACTERISTICS

Water Use: Low

Edible Fruit Producing: No

Allergenic: Low

BVOC Emissions: High

Sonoran Desert Native: No

Invasive Species: No

Tree Care: Plant in full sun. Tolerant in most soils. Drought tolerant, so watering is not necessarily needed. Elevate the base when pruning.
